Year Established: 1967

Acres/Hectares: 75 acres

Address: 3250 Hessen Strasse, St. Clements, Ont. N0B 2M0

Winery Included? *No*

Available Crop Varieties as of 2008:

Available Crop Description
Approx.

1. Strawberries – Mid-June. We have pick your own, and pre-picked available. – generally a 3-4 week season
2. Red Raspberries – First week in July (some overlap with strawberries) – pick your own and pre picked available - starts with red varieties first, then the Purple variety-(about 7-14 days following red)
3. Black Raspberries – Black raspberries generally same as purple raspberries.

4. Yellow Raspberries – Yellow are still new to us – but both PYO and pre-picked should be available – and I think they also start the season. Our yellow variety is a little milder flavour than the red varieties we have.
5. Blackberries – Will be local and pre-picked and are into August. (Last year there weren't many available to us) We are planting this year, and should be ready – hopefully – to pick your own in 2 years.
6. Elderberries – August, and will be local pre-picked.
7. Serviceberries – mid-summer into August. Will be local pre-picked.
8. Blueberries – August, and will be local pre-picked.
9. Pumpkins – Pumpkins, squash, and gourds – many, many varieties of each are available mid-September to Halloween. Pumpkins can also be pick your own for the regular varieties.
